What was your biggest surprise in touring USD 432 facilities?	I think when you "Glance" at our facilities- everything looks "fine". When you really look at them Wow!		
	Unutilized Space Potential in basement Biggest surprise- How the floors were and how the front sinkholes were. I also was surprised by how much space there was. Biggest surprise was hearing that we have only one hot water shower in JH locker rooms. I was surprised to see foundational cracks and track cracks.		
What are you most excited to see come from our tour of the buildings and grounds at Victoria Schools?	I fee like there is a lot of potential Just need to get people on board. Small bites on the large elephant and hopefully changes will snowball		
	I'm excited as a student for the sinkholes to be possibly repaired because having metal and concrete blocks make our school look kind of bad as a passerby. I would like to see old HS cafeteria and weight room turned into some sort of use for our district. I would like to see tin gym revamped or torn down to utilize that space.		
	Would love to see basement space utilized at VHS for extra-curricular/ fun things that make kids enjoy and look forward to.		
	I was excited to see space that could provide new opportunitites for students. I was excited to see the work that has been done to try to maintain what we have.
